

# wix-users

The wix-users module contains functionality for working with your site's users from client-side code. [Learn more.](#)

## Guides

Additional information about this section

[Introduction](#)

## Properties

Store values associated with an object

<a href="#">currentUser</a>	Gets the current user viewing the site.
-----------------------------	---

## Functions

Perform actions on an object

<a href="#">applySessionToken()</a>	Logs the current user into the site using the given session token.
<a href="#">emailUser()</a>	Sends a Triggered Email to the currently logged-in site member.
<a href="#">getCurrentConsentPolicy()</a>	Gets the user's consent policy regarding allowed cookies and 3rd-party data transfer, such as for GDPR or CCPA purposes.
<a href="#">login()</a>	Logs a user in based on email and password.
<a href="#">logout()</a>	Logs the current user out of the site.
